NEW GENERATION OF
CURTAIN CONTROL SYSTEM

120 Months or 120 Thousand Cycles Golden Guarantee.

Innovative Solution for Your HOTELS

Automatic curtain systems are one of the greatest innovations and manifestations of the technological era. They add much prestige to hotel hospitality and significantly increase guest satisfaction. In fact they are new requirements for hotels whether a major international chain, a small charming hotel or multi-purpose resort, all these hotels now need to embody a new service concept, Silky Rider.

Silky Rider has developed intelligent solutions for the operation of hotel curtains; this system contributes to the prestige and value of the hotel. It improves comfort for occupants while also reducing energy costs. Overall Silky Rider

improves hotel comfort, hospitality, and economic efficiency. It also saves on maintenance, cleaning and operational costs due to remote control which means less time spent in the rooms.

Silky Rider is flexible to install, easy to use and compatible with most protocols and control units on the market, it is a perfect match for the needs and restrictions of the luxury hospitality sector. In rooms, reception or meeting areas, keeping temperature at a constant level and controlling natural light are the key factors in perceived comfort.

Test Silky Rider for Free

Up to four rooms in your hotel can be equipped with the Silky Rider free of charge, for you and your guests' evaluation of its efficiency and convenience. We hope to cooperate with you and contribute to your successful business.

• Good night system:

One of the best Silky Rider systems which has been designed especially for hotels is the Good Night system. It can close the curtain at night automatically.

• Advantages:

1. This system saves energy by closing the curtains at night time
2. It makes a cozy and private environment
3. It shows technology in hotel rooms
4. It doesn't require for hotel staff to close the curtains manually
5. It decreases maintenance costs

• Card system:

This is a unique system which can be installed in less than 2 minutes in hotel rooms. As the card is in the wall card-holder the room curtains will be opened automatically and as soon as the card is off the wall card-holder the curtains will be closed automatically.

• Advantages:

1. This system saves energy by closing the curtains when the guest is out of the room
2. As soon as the guest is in the room the curtain is opened which is welcoming
3. As soon as the guest leaves the room the curtain is closed

SILKY RIDER
**SAVES
ENERGY**
BY AT LEAST
30%

Using Silky Rider unique systems to save Energy:

- | | |
|--------------|-------------------|
| ① Auto Pilot | ④ Sun Protection |
| ② Card | ⑤ Heat Protection |
| ③ Good Night | ⑥ Remote Control |

Silky Rider doesn't need any special setup or installation, unlike other devices, which often require a full day in order to be installed; anyone can install Silky Rider in less than 5 minutes. One of its best features is that hotel maintenance personnel can install it at a lower and accessible height, therefore, there is no need for any outside contractors or periodic check-ups.

Even if once in a blue moon it requires maintenance or replacement, hotel staff can change it themselves in no time, which means no room ever stays out of

order and vacant due to a faulty curtain system. One of the most useful Silky Rider settings for hotels is the "Good Night" system. There's no need for the housekeeping staff to check the curtains and turn down the rooms at night. Conveniently, Silky Rider does it precisely and flawlessly.

Silky Rider is hotel's new best friend; you should make a new friend too and give it a try.

**SILKY RIDER CAN BE INSTALLED, REPLACED
& ALSO EXCHANGED BETWEEN ROOMS JUST
BY HOTEL STAFF IN LESS THAN**

5 minutes

without the need of outside contractors.

Why Silky Rider is the hotels' best friend:

1. It saves energy in 6 different ways.
2. It can be installed by hotel's staff in a couple of minutes not outside contractors.
3. It can be replaced by hotel's staff in a couple of minutes not outside contractors.
4. It can be exchanged between rooms by hotel's staff in a couple of minutes not outside contractors.
5. It can be controlled by any Smart Systems, such as KNX protocol.
6. It can be easily installed at any height.
7. It will be ready to use as soon as it is installed.
8. It doesn't require adjustment.
9. It doesn't require set up.
10. It doesn't require maintenance.
11. It doesn't require check-ups.
12. It is an investment.
13. It reduces the cost of curtains washing.
14. It reduces the daily maintenances by hotel staff.
15. It reduces the wear and tear of curtains and rails.
16. It reduces laundry detergents usage.
17. It reduces the cost of cooling and heating systems.
18. It is made in USA.
